For almost 200 years accountants have been charged with helping organizations make decisions utilizing financial information. For the vast majority of that time, allocation-based methods of accounting have dominated the landscape and are integral to almost every business decision made today.

Throughput Accounting - scienceofbusiness.com

Debits and credits occur simultaneously in every financial transaction in double-entry bookkeeping. In the accounting equation, $Assets = Liabilities + Equity$, so, if an asset account increases (a debit (left)), then either another asset account must decrease (a credit (right)), or a liability or equity account must increase (a credit (right)). Note also that in the extended equation, revenues ...
