### **Integra Digital TV Cable Channel Lineup**

Digital television (DTV) is the transmission of television signals, including the sound channel, using digital encoding, in contrast to the earlier television technology, analog television, in which the video and audio are carried by analog signals. It is an innovative advance that represents the first significant evolution in television technology since color television in the 1950s.

### **Digital television - Wikipedia**

In most telecommunications organizations, a virtual channel is a method of remapping the program number as used in H.222 Program Association Tables and Program Mapping Tables to a channel number that can be entered via digits on a receiver's remote control. The intelligent digital mesh is a foundation for future digital business and its ecosystems. A "virtual channel" was first used for ...

The Titan 2 Medium Gain Preamplifier will amplify signals received by your antenna. This antenna amplifier is a medium gain, low noise preamplifier used to allow weaker signals at the antenna to be amplified to a viewable strength, and is ideal for installations in which broadcast towers are located at widely varying distances.
