Climate change is a change in the statistical distribution of weather patterns when that change lasts for an extended period of time (i.e., decades to millions of years). Climate change may refer to a change in average weather conditions, or in the time variation of weather within the context of longer-term average conditions, defined by the World Meteorological Organization as a 30 years or ...

Financing climate change is an important part of the World Bank Group's business. Our focus has resulted in significant financing flowing to support low-emissions and resilient development. For example, mitigation support for the world's poorest countries through the Bank's IDA reached \$2.3 billion during fiscal year 2013, while the IFC's mitigation financing increased 50 percent to \$2.5 billion.
