The first step in developing an adaptive remedial strategy and associated interim objectives is to identify potential components of the adaptive remedial strategy, including remediation technologies, containment methods, ICs and any other technical or management approaches that can be used in combination to achieve site objectives.

Remediation management of complex sites using an adaptive

Every year, the average citizen of a developed country produces about half a tonne of waste, thus waste management is an essential industry. Old waste management systems based on the collection of mixed/sorted waste and transporting it a long way to disposal sites has a significant negative impact on the environment and humans.
