### **An Overview of the C++ Programming Language**

Human-based computation (HBC), human-assisted computation, ubiquitous human computing or distributed thinking (by analogy to distributed computing) is a computer science technique in which a machine performs its function by outsourcing certain steps to humans, usually as microwork. This approach uses differences in abilities and alternative costs between humans and computer agents to achieve ...

Mathematica, Maple, and similar software packages provide programs that carry out sophisticated mathematical operations. Applying the ideas introduced in Computer Algebra and Symbolic Computation: Elementary Algorithms, this book explores the application of algorithms to such methods as automatic simplification, polynomial decomposition, and polynomial factorization.

### **Computer Algebra and Symbolic Computation: Mathematical**

I am interested in all aspects of computer vision and related problems in other fields. My thesis was on shape and object recognition in images using a new take on deformable templates.

### **Alex Berg Computer Vision UNC Chapel Hill**

The present code is an implementation of MonadPlus and the MonadPlus transformer with fair conjunctions and disjunctions and with distinct good termination properties. This implementation terminates whereas more conventional MonadPlus realizations (e.g., the List monad) diverge. Here's an example ...
