Business Analytics Principles, Concepts, and Applications

Methods and Applications in Fluorescence focuses on new developments in fluorescence spectroscopy, imaging, microscopy, fluorescent probes, labels and (nano)materials. It will feature both methods and advanced (bio)applications and accepts original research articles, reviews and technical notes.

Methods and Applications in Fluorescence - IOPscience

1. Introduction. This paper documents the basic concepts relating to big data. It attempts to consolidate the hitherto fragmented discourse on what constitutes big data, what metrics define the size and other characteristics of big data, and what tools and technologies exist to harness the potential of big data.

Beyond the hype: Big data concepts, methods, and analytics

"This is, quite simply, the best book out there for teaching introductory TV courses. The text is well-conceived and engaging, and Butler does a superb job of illustrating the formal and aesthetic structures of television in a clear and readable manner."

Image segmentation is one of the most important tasks in medical image analysis and is often the first and the most critical step in many clinical applications. In brain MRI analysis, image segmentation is commonly used for measuring and visualizing the brain's anatomical structures, for analyzing brain changes, for delineating pathological regions, and for surgical planning and image-guided ...

Computational and Mathematical Methods in Medicine - Hindawi

The purpose of this Request for Information (RFI) is to solicit feedback from utilities (investor-owned, municipal, and electric cooperative), the solar industry, academia, research laboratories, government agencies, and other stakeholders on issues related to the net valuation of solar photovoltaics (PV) and innovative cost-effective distributed solar PV deployment models.

Financial Opportunities: Funding Opportunity Exchange

Concept learning, also known as category learning, concept attainment, and concept formation, is defined by Bruner, Goodnow, & Austin (1967) as "the search for and listing of attributes that can be used to distinguish exemplars from non exemplars of various categories". More simply put, concepts are the mental categories that help us classify objects, events, or ideas, building on the ...

Statistics is a branch of mathematics dealing with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

The Embedded Design Handbook complements the primary documentation for the Intel tools for embedded system development. It describes how to most effectively use the tools, and recommends design styles and practices for developing, debugging, and optimizing embedded systems using Intel-provided tools. The handbook introduces concepts to new users of Intel's embedded solutions, and helps to ...
