Basic Principles and Calculations in Chemical Engineering

Historically, the chemical engineer has been primarily concerned with process engineering, which can generally be divided into two complementary areas: chemical reaction engineering and separation processes. The modern discipline of chemical engineering, however, encompasses much more than just process engineering.

The chemical industry is growing. By 2035, the market is expected to reach around 6.5 billion dollars, more than double what it is today. Shorter product lifecycles, difficult access to raw materials, and high customer demands pose tremendous challenges for chemical companies.
