Chapter 5 addresses the design of concrete floors as it relates to their constructibility. Specific design requirements for concrete floor construction are found in ACI 360R for slabs-on-ground, ACI 223R for shrinkage-compensating concrete floors, and ACI 421.1R and 421.2R for suspended floors.

If a concrete floor is allowed to remain relatively dry while in use many problems can be avoided. Concrete needs water in order to begin the hydration process; however unwanted moisture in concrete floors causes millions of dollars of damage and lost time each year to owners of concrete floors. THE PROBLEM
