In chemistry, a coordination complex consists of a central atom or ion, which is usually metallic and is called the coordination centre, and a surrounding array of bound molecules or ions, that are in turn known as ligands or complexing agents. Many metal-containing compounds, especially those of transition metals, are coordination complexes. A coordination complex whose centre is a metal atom ...

My research focus on design and implementation of programming abstractions in areas that have included real-time embedded systems, concurrent and distributed systems and more recently scalable data analytics.. I have published in venues that specialize in Programming Languages, Virtual Machines, Compilers, Software Engineering, Real-time Computing, and Bioinformatics.
