ABSTRACT ALGEBRA: AN INTRODUCTION is intended for a first undergraduate course in modern abstract algebra. Its flexible design makes it suitable for courses of various lengths and different levels of mathematical sophistication, ranging from a traditional abstract algebra course to one with a more applied flavor.

If a binary operation is associative, repeated application of the operation produces the same result regardless how valid pairs of parenthesis are inserted in the expression. This is called the generalized associative law. For instance, a product of four elements may be written in five possible ways:

Aging induces physiological changes in skeletal muscle, including defective mitochondrial energetics, atrophy, loss of strength and power, and insulin resistance. Exercise training is a potent countermeasure to improve glucoregulation by increasing skeletal muscle insulin sensitivity and mitochondrial respiratory capacity and warding off aging muscle atrophy.
