MATLAB (matrix laboratory) is a multi-paradigm numerical computing environment and proprietary programming language developed by MathWorks. MATLAB allows matrix manipulations, plotting of functions and data, implementation of algorithms, creation of user interfaces, and interfacing with programs written in other languages, including C, C++, C#, Java, Fortran and Python.

Millions of engineers and scientists worldwide use MATLAB ® to analyze and design the systems and products transforming our world. The matrix-based MATLAB language is the world's most natural way to express computational mathematics.

MATLAB Documentation

Millions of Engineers and Scientists Trust MATLAB. MATLAB ® combines a desktop environment tuned for iterative analysis and design processes with a programming language that expresses matrix and array mathematics directly.. Professionally Built. MATLAB toolboxes are professionally developed, rigorously tested, and fully documented.

A 4th-generation programming language (4GL) or (procedural language) is any computer programming language that belongs to a class of languages envisioned as an advancement upon third-generation programming languages (3GL). Each of the programming language generations aims to provide a higher level of abstraction of the internal computer hardware details, making the language more programmer ...

EDIT - The use of hist and histc is not recommended now, and histogram should be used instead. Beware that none of the 6 ways of creating bins with this new function will produce the bins hist and histc produce. There is a Matlab script to update former code to fit the way histogram is called (bin edges instead of bin centers - link).By doing so, one can compare the pdf normalization methods ...
