Agriculture is the cultivation of land and breeding of animals and plants to provide food, fiber, medicinal plants and other products to sustain and enhance life. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The study of agriculture is known as agricultural ...

### **Agriculture - Wikipedia**

Modelling techniques have been harnessed in a wide variety of agricultural domains (); these include high-resolution field maps of soil properties , pasture growth rate , greenhouse gas emissions amongst others. For animals, basic activity patterns can be quickly derived through the use of GPS-enabled collars , . More sophisticated models by which to infer behaviour may then be constructed using ...

A logistic function or logistic curve is a common "S" shape (sigmoid curve), with equation:  $y = \frac{L}{1 + e^{-k(x-x_0)}}$  where  $e$  = the natural logarithm base (also known as Euler's number);  $x_0$  = the x-value of the sigmoid's midpoint;  $L$  = the curve's maximum value, and;  $k$  = the logistic growth rate or steepness of the curve.; For values of  $x$  in the domain of real numbers from  $-\infty$  to  $+\infty$ , the S-curve ...
