The kernel is a computer program that is the core of a computer's operating system, with complete control over everything in the system. On most systems, it is one of the first programs loaded on start-up (after the bootloader).It handles the rest of start-up as well as input/output requests from software, translating them into data-processing instructions for the central processing unit.

Een besturingssysteem (ook wel: bedrijfssysteem, in het Engels operating system of afgekort OS) is een programma (meestal een geheel van samenwerkende programma's) dat na het opstarten van een computer in het geheugen geladen wordt en de hardware aanstuurt. Het fungeert als een medium tussen de hardware en de computergebruiker met als opzet dat de gebruiker programma's op een gemakkelijke en ...
