A paradigm shift, a concept identified by the American physicist and philosopher Thomas Kuhn, is a fundamental change in the basic concepts and experimental practices of a scientific discipline. Kuhn contrasts paradigm shifts, which characterize a scientific revolution, to the activity of normal science, which he describes as scientific work done within a prevailing framework (or paradigm).

The place of the Bible in the scientific task of understanding the natural world has conflicted the minds of Christians at least as far back as the time of Augustine. Over two millennia the role of Scripture in scientific explanation has ebbed and flowed according to time and place. Recently, there has been an increasing number of books and articles seeking to analyze the role of scripture in ...
